

New Kudelski Security Suite Aims to Improve Planning, Management and Reporting for Cyber Executives

Expanded Offerings Continues Company's Focus on Empowering Executives to Align Security Strategies with Business Goals

CHESEAUX-SUR-LAUSANNE, Switzerland and PHOENIX (AZ), USA, October 25th, 2017 – Kudelski Security, the cybersecurity division of the Kudelski Group (SIX:KUD.S) and [trusted innovator](#) for the world's most security-conscious organizations, today introduced the availability of its CxO Performance Solutions (CPS). The new suite of offerings is aligned to the executive security role, which has rapidly developed in recent years. It helps these professionals effectively address demands such as alignment of security and business plans, cyber program measurement, advancement of leadership and communication skills, and the translation of highly technical concepts into information relevant to a board of director audience.

Targeting executive audiences, CPS includes:

Cyber Reporting for Boards and Committees: An annual engagement that starts with an intensive tailored program of accompaniment, designed to modernize board presentations, review opportunities and reduce the time it takes to prepare a high-impact report. The program is led by Kudelski Security executive advisors supported by retained board members. Clients learn how to engage meaningfully with boards and committees, define priorities and expectations, while also reviewing security strategy, metrics and communication approaches. Outcomes include:

- Streamlined reporting process, framework and design to save time and eliminate complexity.
- Increased cybersecurity program understanding by the board through report standardization, meaningful metrics that defend investment initiatives.
- Increased influence by instilling confidence among top executive management.
- Ongoing support provided to prepare for more effective board meetings.
- Continuous industry-based threat intelligence updates.

CISO Executive Leadership: Inspired by professional athletics, the service delivers coaching/mentoring that moves beyond theory and into real-world practice. By pairing CISOs with a certified coach and Fortune 500 CISO mentor, the dynamic training combination fully covers skills acquisition and knowledge transfer. Three programs are offered to meet individual needs:

- *Leadership Review:* A foundational assessment to provide core guidance on strengths and challenges, along with a plan to address them.
- *High-Impact Initiative-based Coaching:* A powerful blend of mentorship and coaching adapted to specific objectives, driven by a short-term and specific needs.
- *Intensive Development:* Mentors provide strategies and tactics to help CISOs become more effective executives, while coaches focus on leadership and team development, operational excellence and innovation adoption.

The CPS suite aligns with Kudelski Security's [Secure Blueprint](#)[™]. Developed by CISOs for CISOs, the goal of Secure Blueprint is to build a common communication method to convey "real-time" program maturity, with tools enabling smart decisions and a business-aligned cybersecurity roadmap spoken through a risk management and financially oriented language.

"Security leaders today have a real challenge in communicating progress and maintaining alignment with the business," said Rich Fennessy, chief executive officer of Kudelski Security. "In many organizations, CISOs are presenting to their board of directors on a quarterly basis. In an era of high risk, constrained resources and limited budgets, executive communications must be as fine-tuned as security posture."

The CPS suite is part of Kudelski Security's [world-class advisory services](#), supported by four core competencies: Strategy and Governance; Threat, Vulnerability and Risk Management; Incident Response and Cyber Resilience; and Strategic Cyber Staffing. The introduction of the CPS suite marks Kudelski Security's continuation of setting new, modern standards in cybersecurity program management to support CISOs.
