

Kudelski Group and Idneo technologies announce partnership to make IoT and OT simple and secure

- Idneo will integrate the Kudelski IoT Security Platform with devices it designs and manufactures for its industrial, medical, and consumer products clients.
- The partnership supports Idneo's mission to help their clients connect the physical world with the digital world in order to create new business models and operational efficiencies.
- The Kudelski platform will enable core IoT business drivers like monetization, safety and privacy while protecting intellectual property and ensuring regulatory compliance.

Cheseaux-sur-Lausanne, Switzerland and Barcelona, Spain – February 4th, 2019 – The Kudelski Group (SIX: KUD.S), the world leader in digital security, and Idneo Technologies, a leading engineering service company with deep technological know-how in industrial, medical, consumer and IoT products, today announced a partnership to make IoT easy and secure by pre-integrating the Kudelski IoT Security Platform with Idneo's portfolio of solutions.

Adding connectivity to previously unconnected devices enables many new opportunities, including new business models, new features, data for critical decision making, and operational efficiencies that increase profitability. Protecting IoT devices and data that enable these benefits is critical to achieving long-term return on investment from IoT projects.

Idneo helps their customers connect the physical world into the digital one through their technology development, validation and manufacturing services for companies around the world. It will now work with Kudelski to secure the devices it manufactures for its clients, enabling the monetization of new business models, controlling access to new features, ensuring safety through anti-tampering, safeguarding privacy by keeping data confidential, protecting intellectual property, and helping establish regulatory compliance.

Jean-Michel Puiatti, Kudelski Group Senior Vice President for IoT Security: "As the IoT market continues to grow and companies connect more and more devices to generate more business, security will give them a competitive edge that ensures their long-term success. By combining our 30 years of heritage in protecting high-value business models with Idneo's expertise in designing and manufacturing value-added technology products, we will empower joint customers to fully realize their objectives and achieve their IoT/OT goals."

Raúl Lucas, CEO of Idneo: "Security is the major concern in the context of IoT and OT and a huge challenge for companies nowadays. Our alliance with Kudelski Group, the global leader in digital security, is a significant milestone that upgrades our innovative and global technological service by providing maximum secure solutions to our clients, which is an added value to increase their competitiveness, operational efficiencies and profitability".

The IoT Security Platform is part of the Kudelski IoT Security Suite, a comprehensive set of solutions and services that make IoT easy and secure. The Security Suite includes the IoT Security Center of Excellence, which helps customers design, evaluate and certify secure IoT solutions, as well as Managed Security Services, offering threat prevention, detection and response in order to manage the entire security lifecycle.
